

## DEXTER WHITE CAPS STOPING ON EXTENSIVE SCALE

OPERATIONS TO BE RUSHED  
TO SUPPLY ORE TO THE  
ASSOCIATED MILL.

Special to the Bonanza

MANHATTAN, July 17.—On account of a new regulation from the Associated mill for 500 tons of ore, the Dexter White Caps has begun stoping on a somewhat extensive scale at the end of the east drift in the vicinity of where the raise toward the old east shaft is being opened. This ore lies there in tremendous quantity, its limitations not being known. The shoot long has been known to be large, but it is lower grade than that in the main central stopes. Various samplings and assays indicate that it will average \$20 a ton. As there is so much of it this average, or a few dollars a ton more or less, means a huge return when stoping is fairly under way, with milling progressing in earnest.

Some stoping is in progress in the central works and this ore likewise is being hauled to the mill by the Blaker teams. It is of the same high milling grade as before and it used with the other may sweeten it up to a basis of \$30 or more. The upwards of 2000 tons that have been stoped from there have made a comparatively small impression on the showing, for there are many more thousands from the great width, length and depth of the shoot, still in sight.

Sinking on the shaft to obtain water for the mill, and incidentally to be used hereafter in extracting the ores from the lower level, has been interfered with considerably by unexpected calls from the mill for ore. However, four or five more days in the shaft will finish it to the region of 250, where it will remain until the mapped out work at and above the 165 is completed.

## FUED STARTS AS RESULT OF MURDER IN NEW YORK

DISTRICT ATTORNEY DECLARES  
THAT POLICEMEN WERE  
NEGLIGENT

NEW YORK, July 17.—A feud has started between the police department and District Attorney Whitman, as a result of the murder of Herman Rosenthal yesterday. The police deny Whitman's charges that the murder was the result of the police system. Whitman declared there were five policemen 300 feet from the place where the shooting occurred, that two policemen were within 100 feet and one officer was within 50 feet, and yet the five men who shot Rosenthal entered an automobile and made their escape with the police scarcely pretending to take up the pursuit and even arresting the man who tried to give the right number of the escaping automobile.

The public feels that the murder was the work of a secret organization defying the law. The grand jury is probing Rosenthal's testimony given before his death. It is known that Police Lieutenant Decker loaned Rosenthal \$1500 and in return demanded 20 per cent of Rosenthal's profits from his gambling house.

Postmaster J. W. Stewart and wife left Sunday for San Francisco where they will spend several days visiting. Mr. Stewart is enjoying his annual vacation.

## AMUSEMENTS

Tonight at the Butler an entire change of program will be seen. Both vaudeville teams will be heard in an entirely new repertoire of songs and sayings. The pictures are exceptionally good ones as follows:

The feature picture for tonight's show is one of the best ever produced by the Kalem company and is one of its first releases in a foreign land, entitled "Egypt As It Was in the Time of Moses." This is a sublime picture and carries one back 2000 years, showing the people of that ancient land in their different vocations just as it was in the time of Moses.

"A Railroad Engineer," a Lubin subject, showing the brave engineer crawl from his cab and snatch the little sister of his sweetheart from the very jaws of death in front of his engine while it is going at a terrific speed.

"A Citizen in the Making." Selig presents this film taken from actual scenes during the landing of the Jewish emigrants at Ellis Island. A beautiful romance is interwoven which makes it very interesting as well as educational. A good show is promised and a large attendance anticipated.

## THREE YEAR LEASE IS GRANTED ON CASH BOY AND WORK WILL START BY SINKING OF SHAFT

Within the next 30 days operations will be resumed on the Cash Boy Mining company ground, by a leasing corporation. The lease was granted yesterday following a meeting of the Cash Boy directors, held in this city. Under the terms, the lease will run for three years, and a moderate royalty is exacted.

The leasers have incorporated under the name of the Tonopah Leasing & Mining company and will have a capitalization of 1,000,000 shares. The stock, of which a small amount will be offered, will be placed on the market at 10 cents a share. At a meeting of the incorporators, the following were chosen officers and directors: T. F. Bonneau of San Francisco, president; E. H. Mead of Tonopah, secretary and treasurer; George B. Thatcher of Tonopah, director; J. C. Robertson of Tonopah, director, and W. F. McCormick of Salt

Lake, director. A steam hoist is now on the ground, but it is probable that an electric plant will be substituted, and should the directors decide on this change, the operations will hardly be delayed more than a week. The present shaft is down to a depth of 540 feet and this will be continued until the 800 or 1000-foot mark is reached when drifting will be started for the veins known to penetrate that direction.

The work of repairing the shaft will be started within a few days. A preliminary examination of the workings has showed the shaft in excellent condition and it is believed the timbering, placed there several years ago, remains in serviceable condition. A small amount of water, seeping from the surface, is to be found in the bottom of the shaft and this will be taken out without delay.

A cement foundation was built on the lot several years ago. At that time plans were being carried out for the erection of a hotel, but the panic intervened and the work stopped. ## ENGLAND IS INSTIGATOR FOR FREE TOLLS

BELIEVED UNITED KINGDOM RESPONSIBLE  
FOR FIGHT OVER  
CANAL

WASHINGTON, July 17.—Congressman Knowland told President Taft today that the American railroads, acting with the Canadian transcontinental lines, had instigated England's protest for free tolls for American vessels through the Panama canal. After a conference Knowland said "It is the railroad fight. Free tolls for American vessels means lower railroad rates. We built and financed the canal and congress will not concede England's right to dictate the tolls."

It is doubted whether America will be willing to submit the question to The Hague, because all the foreign interests will be against America. A British protest is expected tomorrow, to be forwarded to the senate. Taft may also send a special message.

## SENSATION IS CAUSED BY NEW VACUUM WASHER

HUGE TUB OF CLOTHES THOROUGHLY  
CLEANSED IN THREE  
MINUTES

The washing of a huge tub of dirty linen at the demonstration of the vacuum washing machine yesterday, created quite a sensation among the spectators who were present. The washing was thoroughly done in three minutes and at the conclusion, a huge double blanket was also sent through the cleaning process in exactly the same time.

Several women in the audience asserted that chemicals had been used in the preparation of the water, but this assertion was denied by the managers who conduct the demonstration. It is claimed that nothing but laundry soap and water are used, and to prove this claim, will allow any person to prepare the tub and supply the dirty clothes. The demonstrations, which are being held every afternoon at 4 o'clock at the corner of Brougher avenue and South street, will be continued for the next few weeks.
